

Education

Tutor: Cat

Subjects:

- GCSE Biology, Chemistry and Physics
- A-Level Biology

Qualifications:

Bsc Hons University of the West of England (Applied Biological Science) 2003-2006

PGCE University of the West of England (11-18 Science) 2006-2007

I have taught Science in several schools over the last 16 years. In my last post I was the Head of Biology, responsible for student progress and curriculum development.

For the last 5 years, I have marked exam Physics and Biology GCSE papers for AQA and A-level Biology for Edexcel and OCR.

In the last two years, I have tutored several students at both GCSE and A-level, both online and face-to-face, across several exam boards, including AQA, OCR, Edexcel and the International Awards.

Availability: Flexible weekdays and weekends during term time and holidays.

Testimonials:

“Cat tutored my son in the run up to his GCSEs, as he was struggling with gaps in his knowledge and answering exam questions. She was reliable, organised and knew the content. My son enjoyed her lessons and felt more confident when going into his exams. He achieved the grades needed to get into college, which I mostly put down to his extra sessions with Cat.”

“My daughter missed a lot of school due to illness but has dreams of attending University to study Veterinary Science. I knew I needed to help her to catch up on missed work, so I looked

for a tutor. I am so glad I found Cat. My daughter had another tutor previously, who didn't work out, but Cat is always well planned and positive in her lessons with my daughter. She is flexible when my daughter is ill and can't make her lessons and has helped my daughter increase her confidence with the Biology knowledge. She is patient and always explains things well. My daughter is feeling much more positive and looks forward to her lessons with Cat. I highly recommend Cat as a tutor."
